

As a truck driver I find the XM radio to be exceptional, especially the traffic reports. They give exact information continuously without my having to try and locate a local station while driving down the road 85' long and grossing 100,000 lbs. I don't have the luxury of scanning the radio stations hoping to hit one that has the traffic report on when I need it. XM radio traffic reports are a life saver for me and everyone around me.
